

## Healthcare Quality Reporting Program

### Hospital Summary Report

The Rhode Island Department of Health publishes information about hospitals. If you know that you or a family member will need hospital care, this information can help you compare hospitals and choose among them. You may also want to ask your doctor, friends and family members for their thoughts and experiences.

This report summarizes information from the Department of Health ([www.health.ri.gov/hospitals/about/quality](http://www.health.ri.gov/hospitals/about/quality)) and Medicare ([www.medicare.gov/hospitalcompare](http://www.medicare.gov/hospitalcompare)). Reports with more information are available at those websites.

This report is updated every time there is new information for one of the columns below. Some of the information is just for patients receiving care in the intensive care unit (ICU), all other measures are for all patients. You can learn more about what is in this report, including the patients included, definitions and time periods for each column of information, by reading the Methods Report. Keep in mind that different hospitals have different patient populations and this can impact how well they do on these measures. Please contact hospitals directly with questions.

Facility, Alphabetical	Quality:		Emergency Department (ED):		Infections:						Satisfaction:		
	Rate of Readmission after Discharge	Serious Surgical Complications	Minutes Spent in the ED Before Being Seen by a Healthcare Professional	Minutes Spent in ED After the Doctor Decided to Admit, Before Being Taken to An Inpatient Room	ICU Catheter-Associated Urinary Tract Infections	ICU Central Line-Associated Bloodstream Infections	C. Difficile Infections	Hand Hygiene is Measured	Healthcare Workers Who Received Flu Vaccination	MRSA Central Line Bloodstream Infections	Patients who Reported the Hospital Was Clean	Patients who Gave Their Hospital a 9 or 10	Patients who Would Recommend the Hospital
